Javascript	JAVA Core	AI tools

PROJECTS

Chatting Application (In Progress)

- A real-time chatting application that allows users to connect and chat with friends, with all data securely stored in a cloud database.
- Tech Stack: HTML, Tailwind CSS, JavaScript, React, Firebase
- Designed a responsive and modern UI using Tailwind CSS and React
- Integrated Firebase Authentication for secure user login and registration
- Implemented real-time messaging using Firebase Realtime Database / Firestore
- Added message timestamps for tracking conversation flow
- Developed image sharing and emoji support for richer chat interactions
- Currently working on chat room creation and improved user experience features

Swiggy Clone (In Progress)

- A food delivery web app replicating Swiggy’s core features, built with modern UI and real-time data.
- Tech Stack: HTML, Tailwind CSS, JavaScript, React
- Designed an intuitive, responsive UI mimicking Swiggy’s layout
- Integrated live API to fetch restaurant and menu data
- Implemented dynamic routing for individual restaurant pages
- Currently working on cart functionality and seamless user experience
